

The ENRIECO Project:
ENVIRONMENTAL HEALTH RISKS IN EUROPEAN BIRTH
COHORTS

ENV-FP7-2008-226285

Deliverable 13

Searchable database of birth cohorts

Work Package 1

Work Group Leader	:	Martine Vrijheid (CREAL)
Participants	:	Maribel Casas (CREAL)
Deliverable	:	13
Title	:	Searchable database of birth cohorts
Nature	:	O
Dissemination level	:	PU
Planned	:	Month 21 (November 2010)
Actual	:	30 November 2010

The ENRIECO Inventory contains data on environment and health of 39 birth cohorts. It has been integrated in the already existing birthcohorts.net, an online inventory of voluntarily registered birth cohorts which aims to facilitate exchange of knowledge and collaboration between cohorts and researchers. The online version of the inventory can be found at <http://www.birthcohorts.eu>.

The ENRIECO web-based inventory database is being updated periodically.
